

Constant Level Oilers

Huileurs à Niveau Constant

Ölstandsregler (Constant Level Öler)

Constant Level Oilers

Widely used in the chemical and process industries, constant level oilers maintain a constant fluid level at all times. Available with BSP or NPT thread. Plastic or glass reservoirs with capacities of 85 cc to 500 cc.

Huileurs à Niveau Constant

Largement répandus dans les industries chimiques et de process, les huileurs à niveau constant assurent en permanence un niveau constant de liquide. Fournis en filetage BSP ou NPT, avec réservoirs en verre ou en plastique ils sont disponibles en capacité de 85 cm³ à 500 cm³.

Ölstandsregler (Constant Level Öler)

Diese Öler halten das gewünschte Niveau der Flüssigkeit immer konstant. Eingesetzt werden sie vor allem in der chemischen Industrie und der Verfahrenstechnik. Lieferbar sind diese Öler von 85 ml bis 500ml, mit Behältern aus Glas oder Plexiglas, Anschlußgewinde Rohrgewinde oder NPT.

ZINC DIE-CAST BODY - PLASTIC BOTTLE

Height adjustment -
Min $\frac{7}{32}$ (5.5mm)
Max $\frac{19}{32}$ (15mm)

TYPICAL APPLICATION

Constant level oilers, depending on type are mounted into either oil level plug or drain plug holes. The cut-off tube MUST be vertical. Final oil level adjustments can be made by filing the cut-off tube or in the case of the VABL by the adjustment screw. To ensure the correct oil level, the gearbox MUST be filled using the oil feeder tube of the constant level.

AUTOMATIC CONSTANT LEVEL SYSTEMS

The advantages of having the Adams RCL 7780 constant level oiler incorporates a float operated "shut-off" valve enabling it to be filled from a central reservoir. As the pump loses oil, the pump and the constant level oiler reservoir levels fall. The valve in the RCL opens taking oil from the central reservoir, when the correct oil level is reached, the float closes the valve. The system is gravity fed using the central reservoir as a header tank. Any number of pumps can be incorporated into an automatic constant level system.
